

Level 40 Café – List of Changes

1. Content Changes

- Homepage hero rebuilt: uniform pill sizes, larger labels, brand-correct imagery per pill.
- New "About Level 40" narrative with image carousel of the six brand concepts; "Our Ecosystem" rewritten and restyled.
- Café picks row limited to four dishes; "Why Level 40" panels shown as a stacked poster pager; drifting brand-story image rail added; Instagram handle added.
- Site metadata updated to "Level 40 – Wellness Integrated Café in Dubai" with matching description.
- About page fully rewritten: new hero, wellness story, location corrected to Continents Tower JVC, new pillars, true brand facts.
- Services page: six cards now mirror the real ecosystem (Healthy Dining, Specialty Coffee, Pickup & Delivery, Nutritionist-Guided Meal Plans, Holistic Yoga, NEAT by Nicky Retail). Meat-dish gallery caption corrected.

2. Team Management

- New Team section in admin: add/edit members with name, designation, bio, photo, display order and Live/Hidden visibility.
- Homepage "Meet the team" now renders admin-managed members with circular portraits.
- Server-rendering error (500) diagnosed and fixed.

3. Blogs Management (Journal)

- New blog posts with title, slug, short description, full article, up to 4 images, hashtags, author, publish date and Live/Hidden flag.
- New Blog section in admin: stat cards, post table with thumbnails, add/edit dialog with image uploads, auto-slug and hashtag input. Saving refreshes public pages instantly.
- Homepage "From our journal" section showing the two newest live posts with "Read all stories".
- /blog lists all live posts in a grid; /blog/[slug] renders the full article with cover banner, hashtags, gallery, date and author.
- Journal added to main navigation; structured data and OpenGraph metadata included; 3 opening posts seeded.

4. Café Menu

- Ingredients removed from menu cards; new Nutrition field rendered as gold pills (calories, protein, carbs, fat, fibre...).
- Admin Café Menu editor gained a Nutrition input; CSV import/export carries a Nutrition column instead of Ingredients.
- Acai Bowl and Berry Antioxidant Boost filled as live examples (placeholder values, editable).
- All 94 café-menu items repriced to whole-AED values between 45 and 60; retail products untouched; prices remain editable in admin.

5. Meal Plans

- Meal Plans page overhauled: new banner image; customer journey redesigned into a snaking flow with numbered badges and arrows.
- Condition-specific programmes surfaced (Diabetes, Weight Management, PCOS, Cholesterol, Longevity); text darkened; fully responsive.

- New homepage "Explore Meal Plans" section with the two flagship plans and link to the full page.

6. Header & Footer

- Header: logo enlarged (48px → 64px), gutters slimmed, Journal added to nav; mobile keeps a smaller logo.
- Footer: brand blurb rewritten ("Eat well. Move well. Live well."); tap-to-call pickup & delivery number; "Get directions" link opening Google Maps.
- Floating WhatsApp button on the homepage with prefilled enquiry greeting.
- Sign-in / sign-up: eye icon to show/hide password.

7. Admin Panel & Deployment

- Team and Blog sections added to the admin sidebar with stat cards, tables and add/edit dialogs.
- Café Menu editor: new Nutrition field; CSV template updated.
- Database migrations for blog posts, removing ingredients and adding nutrition — applied and ready for deploy.
- Seed-safety guard: Vercel build only migrates + builds; seed script refuses to run in Vercel environments unless overridden.
